**ASUHAN KEBIDANAN PADA NY. "S"  
DI PUSKESMAS BABAKAN KABUPATEN CIREBON TAHUN 2024**

xvii + 174 halaman + 3 tabel + 10 gambar + 15 lampiran

**ABSTRAK**

Asuhan Kebidanan Komprehensif adalah manajemen kebidanan yang dilakukan secara berkelanjutan yaitu pemberian asuhan kebidanan mulai dari kehamilan, persalinan, bayi baru lahir, nifas, serta pelayanan kontrasepsi dilakukan dalam upaya menurunkan Angka Kematian Ibu (AKI) dan Angka Kematian Bayi (AKB) yakni dengan mendeteksi dini keadaan ibu hamil agar tidak terdapat penyulit maupun komplikasi.

Jenis laporan ini menggunakan metode *case study* (studi kasus) yang menggunakan pendekatan manajemen kebidanan 7 langkah varney dan di dokumentasikan dalam bentuk SOAP. Hasil penelitian ini yaitu peneliti memberikan asuhan kebidanan komprehensif, asuhan yang diberikan berupa kunjungan hamil 2 kali, bersalin, bayi baru lahir 4 kali, nifas 4 kali dan KB.

Kesimpulan setelah penulis melaksanakan asuhan kebidanan komprehensif pada Ny."S" pada saat asuhan kebidanan kehamilan terdapat kesenjangan antara teori dan praktik yaitu pada Status Imunisasi TT. Pada saat asuhan kebidanan persalian, bayi baru lahir, nifas dan KB berlangsung normal dan tidak ada kesenjangan antara teori dan praktik.

***COMPREHENSIVE MIDWIFERY CARE FOR MRS. "S" AT THE  
BABAKAN PUBLIC HEALTH CENTER CIREBON REGENCY IN 2024***

*Xvii + 174 pages + 3 table + 10 pictures + 15 attachments*

***ABSTRACT***

*Comprehensive Midwifery Care is midwifery management that is carried out on an ongoing basis, namely the provision of midwifery care starting from pregnancy, birth, newborns, postpartum, as well as contraceptive services carried out in an effort to reduce the Maternal Mortality Rate (MMR) and Infant Mortality Rate (IMR), namely by early detection of the condition pregnant women so that there are no complications or problems.*

*This type of report uses the case study method which uses a 7-step varney midwifery management approach and is documented in SOAP form. The results of this research were that the researcher provided comprehensive midwifery care, the care provided was in the form of 2 pregnancy visits, 4 births, 4 times newborns, 4 times postpartum and family planning.*

*The conclusion after the author implemented comprehensive midwifery care for Mrs. "S" during pregnancy midwifery care was that there was a gap between theory and practice regarding TT Immunization Status. During midwifery care for birth, newborns, postpartum and family planning, the process is normal and there is no gap between theory and practice.*
