**KELENGKAPAN PENGISIAN RESUME MEDIS PADA PASIEN RAWAT INAP
BPJS RUMAH SAKIT UNIVERSITAS MUHAMMADIYAH
CIREBON**

xv + 30 halaman + 1 tabel + 1 bagan + 5 lampiran

ABSTRAK

Rekam medis merupakan pelayanan kesehatan yang dapat diintegrasikan dengan menggunakan teknologi informasi. Tujuan penelitian ini adalah untuk mengetahui kelengkapan formulir resume medis pasien rawat inap di Rumah Sakit Umum Muhammadiyah Kota Cirebon.

Saat ini, kelengkapan pengisian resume medis pasien rawat inap di Rumah Sakit Umum Muhammadiyah Kota Cirebon masih mengalami ketidaklengkapan sebesar 73% yang disebabkan oleh kesibukan dokter penanggung jawab pasien dan pasien meminta pulang paksa.

Jenis Penelitian yang digunakan adalah deskriptif dengan pendekatan kuantitatif. Populasi dalam penelitian ini yaitu formulir resume medis rawat inap. Teknik pengambilan sampel menggunakan *simple random sampling*. Teknik pengumpulan data menggunakan metode observasi dengan instrumen penelitian yang digunakan adalah lembar *check list*. Penelitian ini dilakukan di unit rekam medis Rumah Sakit Muhammadiyah Cirebon pada bulan Agustus 2024.

Hasil Penelitian menunjukkan bahwa dari 78 formulir resume medis yang diteliti, sebanyak 21 (21%) formulir resume medis yang terisi lengkap dan sebanyak 57(73%) formulir resume medis yang tidak terisi lengkap. Kelengkapan pengisian resume medis di Rumah Sakit Umum Muhammadiyah Cirebon belum (100%) masih terdapat komponen-komponen yang tidak terisi lengkap. Diharapkan bahwa perlu adanya evaluasi dan sosialisasi kepada petugas rekam medis, dokter dan perawat.

ABSTRACT

Medical records are health services that can be integrated using information technology. The purpose of this study was to determine the completeness of the medical resume form for inpatients at the Cirebon City Muhammadiyah General Hospital.

Currently, the completeness of filling out medical resumes of inpatients at the Cirebon City Muhammadiyah General Hospital is still incomplete at 73% due to the busyness of the doctor in charge of the patient and the patient asking for forced discharge..

The type of research used is descriptive with a quantitative approach. The population in this study is an inpatient medical resume form. The sampling technique uses simple random sampling. The data collection technique uses the observation method with the research instrument used is an check list sheet. This research was conducted in the medical records unit of the Cirebon Muhammadiyah Hospital in August 2024.

The results showed that of the 78 medical resume forms studied, as many as 21 (21%) medical resume forms were completely filled in and as many as 57 (73%) medical resume forms were not completely filled in. Completeness of filling out medical resumes at the General Hospital Muhammadiyah Cirebon not yet (100%) there are still components that are not completely filled in. It is hoped that there is a need for evaluation and socialization to medical record officers, doctors and nurses.

Keywords : Incompleteness, Medical Resume, Inpatient.
