ABSTRAK

Penyebab kematian ibu pada masa kehamilan yaitu masalah reproduksi, komplikasi obstetrik. Antenatal Care (ANC) adalah pemeriksaan kehamilan untuk mengoptimalkan kesehatan mental dan fisik ibu hamil. Tingkat kepuasan pelayanan timbul dari persepsi ibu hamil terhadap pelayanan yang diberikan. Tujuan penelitian ini untuk mengetahui hubungan penerapan 10T dengan kepuasan ibu hamil di wilayah kerja Puskesmas Waruroyom Kabupaten Cirebon Tahun 2023.

Jenis penelitian ini adalah penelitian kuantitatif dengan desain penelitian observasional analitik menggunakan pendekatan cross sectional. Teknik pengambilan data menggunakan *Accidental Sampling* selama 1 bulan terhitung sejak tanggal 12 juni-13 juli 2023 sebanyak 39 responden di wilayah kerja Puskesmas Waruroyom. Instrumen yang digunakan berupa kuesioner kepuasan dan lembar check list penerapan 10T, analisis data menggunakan uji Chi square dengan nilai α 0,05.

Hasil penelitian didapatkan bahwa penerapan 10T pada ibu hamil di wilayah tersebut termasuk kedalam kategori lengkap sebanyak 16 responden (41%) lalu kategori tidak lengkap sebanyak 23 responden (59%). Tingkat kepuasan ibu hamil sebagian besar responden yaitu 16 responden (41%) berada pada kategori puas. Hasil uji chi square menunjukkan p value sebesar 0,008 lebih kecil dari α 0,05 sehingga terdapat hubungan yang signifikan antara penerapan 10T dengan kepuasan ibu hamil di wilayah kerja Puskesmas Waruroyom Kabupaten Cirebon 2023. Puskesmas waruroyom diharapkan dapat menerapkan SOP ANC 10T dengan baik untuk meningkatkan kepuasan ibu hamil.

Kata kunci: *Angka kematian ibu, Penerapan 10T, Kepuasan ibu hamil.*

***THE RELATIONSHIP BETWEEN THE IMPLEMENTATION OF 10T AND
THE SATISFACTION OF PREGNANT WOMEN IN THE WORKING AREA
OF THE WARUROYOM HEALTH CENTER, CIREBON REGENCY 2023***

Iv + 53 Pages + 7 tables+ 2 charts+ 19 appendices

ABSTRACT

The causes of maternal death during pregnancy are reproductive problems, obstetric complications. Antenatal Care (ANC) is a pregnancy examination to optimize the mental and physical health of pregnant women. The level of service satisfaction arises from pregnant women's perceptions of the services provided. The aim of this research is to determine the relationship between the implementation of 10T and the satisfaction of pregnant women in the work area of the Waruroyom Health Center, Cirebon Regency in 2023.

This type of research is quantitative research with an analytical observational research design using a cross sectional approach. The data collection technique used Accidental Sampling for 1 month starting from 12 June - 13 July 2023 with a total of 39 respondents in the Waruroyom Community Health Center working area. The instrument used is a satisfaction questionnaire in the 10T application checklist sheet, data analysis used the Chi square test with a value of 0.05.

The research results showed that the application of 10T to pregnant women in this area was included in the complete category for 16 respondents (41%) and then the incomplete category for 23 respondents (59%). The level of satisfaction of most pregnant women, namely 16 respondents (41%), was in the satisfied category. The results of the chi square test show that the p value is 0.008, which is smaller than 0.05, so there is a significant relationship between the implementation of 10T and the satisfaction of pregnant women in the work area of the Waruroyom Health Center, Cirebon Regency in 2023. The Waruroyom Health Center is expected to be able to implement the 10T ANC SOP well to increase the satisfaction of pregnant women.

Keywords : Maternal mortality rate, Application of 10T, Satisfaction of pregnant women.
