**HUBUNGAN PENGETAHUAN PETUGAS *CLEANING SERVICE*
DENGAN PENGELOLAAN SAMPAH MEDIS DI RUMAH SAKIT UMUM
DAERAH ARJAWINANANGUN**

xvii + 69 halaman + 9 tabel + 2 bagan + 15 lampiran

ABSTRAK

Sampah medis merupakan sisa dari kegiatan fasilitas pelayanan kesehatan yang berbentuk cair, padat, maupun gas yang tergolong dalam Bahan Berbahaya dan Beracun (B3) yang keberadaannya dapat merusak lingkungan dan berdampak buruk bagi kesehatan. Limbah medis jika tidak dikelola menimbulkan berbagai dampak buruk yang bisa menyebabkan berbagai macam penyakit. Tujuan penelitian ini untuk Mengetahui hubungan pengetahuan petugas *cleaning service* dengan pengelolaan sampah medis di Rumah Sakit Umum Daerah Arjawinangun.

Metode penelitian ini menggunakan jenis penelitian survei analitik dengan pendekatan *cross sectional*. Populasi yang digunakan dalam penelitian ini adalah petugas *cleaning service* yang bekerja di Rumah Sakit Umum Daerah Arjawinangun sebanyak 37 orang. Teknik pengambilan sampel yang digunakan ialah total sampling. Instrumen yang digunakan adalah kuisisioner. Analisis data yang digunakan ialah analisis univariat dan analisis bivariat.

Hasil penelitian menunjukkan bahwa sebagian besar pengetahuan petugas *cleaning service* di Rumah Sakit Umum Daerah Arjawinangun responden yang berkategori baik sebesar 21,6%, responden yang berkategori cukup sebesar 27,0%, dan responden yang berkategori kurang sebesar 51,4%. Berdasarkan uji statistik untuk mengetahui hubungan antara kedua variabel Menggunakan *Chi-Square* dengan hasil yang didapatkan nilai p-value 0,002. Maka kesimpulan dari penelitian ini ada hubungan antara Pengetahuan Petugas *Cleaning Service* dengan Pengelolaan Sampah Medis di Rumah Sakit Umum Daerah Arjawinangun. Diharapkan penelitian dapat mendorong dalam peningkatan pengetahuan dan pengelolaan sampah medis melalui kegiatan pelatihan secara periodik.

Kata kunci : pengetahuan, *cleaning service*, sampah medis

***THE RELATIONSHIP BETWEEN KNOWLEDGE OF CLEANING
SERVICE OFFICERS AND MEDICAL WASTE MANAGEMENT AT
THE ARJAWINANGUN REGIONAL GENERAL HOSPITAL***

xvii + 69 pages + 9 tables + 2 charts + 15 attachment

ABSTRACT

Medical waste is the residue of health care facility activities in the form of liquid, solid, or gas which is classified as Hazardous and Toxic Material (B3) whose existence can damage the environment and have a negative impact on health. Medical waste if not managed causes various adverse effects that can cause various diseases. The purpose of this study was to determine the relationship between the knowledge of cleaning service officers with medical waste management at the Arjawinangun Regional General Hospital.

This research method uses analytical survey research with a cross sectional approach. The population used in this study were 37 cleaning service officers who worked at the Arjawinangun Regional General Hospital. The sampling technique used was total sampling. The instrument used was a questionnaire. The data analysis used was univariate analysis and bivariate analysis.

The results showed that most of the knowledge of cleaning service officers at Arjawinangun Regional General Hospital respondents who were categorized as good were 21.6%, respondents who were categorized as sufficient were 27.0%, and respondents who were categorized as less were 51.4%. Based on statistical tests to determine the relationship between the two variables using Chi-Square with the results obtained a p-value of 0.002. So the conclusion of this study is that there is a relationship between the Knowledge of Cleaning Service Officers with Medi Waste Management. It is hoped that the research can encourage increased knowledge and management of medical waste through regular training activities.
