**HUBUNGAN PENGETAHUAN DENGAN PERILAKU PENGELOLAAN
SAMPAH RUMAH TANGGA DI RW 02 WILAYAH KERJA PUSKESMAS
KALIJAGA PERMAI KOTA CIREBON**

xiv + 56 + 4 tabel + 10 gambar + 2 bagan + 13 lampiran

ABSTRAK

Perilaku masyarakat dalam mengelola sampah dipengaruhi oleh pengetahuan masyarakat tentang sampah. Kebiasaan masyarakat membakar sampah di halaman dan membuang sampah sembarangan menyebabkan lingkungan RW 02 terlihat kurang nyaman, terlihat kotor dan pencemaran lingkungan sehingga berdampak pada kesehatan masyarakat tersebut. Hal ini dikarenakan kurangnya pengetahuan masyarakat terhadap perilaku pengelolaan sampah rumah tangga. Berdasarkan hasil wawancara menyebutkan bahwa belum disediakan Tempat Pembuangan Sampah Sementara (TPS) di wilayah RW 02 wilayah kerja Puskesmas Kalijaga Permai. Tujuan penelitian ini adalah untuk mengetahui hubungan pengetahuan masyarakat tentang sampah dengan perilaku pengelolaan sampah rumah tangga di RW 02 wilayah kerja puskesmas kalijaga permai Kota Cirebon.

Jenis penelitian adalah cross sectional, populasi penelitian adalah kepala keluarga di wilayah RW 02 wilayah kerja puskesmas kalijaga permai Kota Cirebon yang berjumlah 1.249, sedangkan sampel yang ambil berjumlah 93 kepala keluarga dengan pengambilan Simple Random Sampling. Analisis data yang digunakan adalah univariat dan bivariat dengan menggunakan uji statistik *chi square*.

Hasil penelitian sebanyak 73 (78.5%) responden yang kurang pengetahuan sedangkan responden yang pengetahuannya baik sebanyak 20 (21.5%), untuk perilaku kurang sebanyak 78 (83.9%) responden dan responden yang perilakunya baik sebanyak 15 (16.1%) responden. Hasil uji *chi square* didapatkan nilai $p = 0.000$ kurang dari $\alpha 0,05$ berarti H_0 ditolak & H_a diterima.

Ada hubungan pengetahuan dengan perilaku pengelolaan sampah rumah tangga di RW 02 Wilayah Kerja Puskesmas Kalijaga Permai Kota Cirebon. Diharapkan agar petugas meningkatkan penyuluhan pengetahuan tentang sampah misalnya melalui penyuluhan atau melalui media massa dan masyarakatnya aktif dalam kegiatan tersebut.

**THE RELATIONSHIP BETWEEN KNOWLEDGE AND HOUSEHOLD WASTE
MANAGEMENT BEHAVIOR IN RW 02 WORK AREA OF KALIJAGA PERMAI
COMMUNITY HEALTH CENTER CIREBON CITY**

xiv + 57 + 4 table + 10 picture + 2 chart + 13 attachment

ABSTRAK

Community behavior in managing waste is influenced by community knowledge about waste. The habit of burning waste in the yard and littering makes the environment of RW 02 look uncomfortable, dirty and polluted, thus impacting the health of the community. This is due to the lack of community knowledge about household waste management behavior. Based on the results of the interview, it was stated that there has not been a Temporary Waste Disposal Site (TPS) in the RW 02 area of the Kalijaga Permai Health Center. The purpose of this study was to determine the relationship between community knowledge about waste and household waste management behavior in RW 02, the Kalijaga Permai Health Center area of Cirebon City.

The type of research is cross-sectional, the population of the study were heads of families in the RW 02 area of the Kalijaga Permai Health Center, Cirebon City, totaling 1,249, while the sample taken was 93 heads of families with Simple Random Sampling. The data analysis used was univariate and bivariate using the chi square statistical test.

The results of the study showed that 73 (78.5%) respondents lacked knowledge while 20 (21.5%) respondents had good knowledge, 78 (83.9%) respondents had poor behavior and 15 (16.1%) respondents had good behavior. The results of the chi square test showed a p value = 0.000 less than α 0.05, meaning H_0 was rejected & H_a was accepted.

There is a relationship between knowledge and household waste management behavior in RW 02, Kalijaga Permai Health Center Working Area, Cirebon City. It is hoped that officers will increase knowledge outreach about waste, for example through outreach or through mass media and the community is active in these activities.
