**KELENGKAPAN PENGISIAN RESUME MEDIS PADA PASIEN RAWAT INAP
BPJS RUMAH SAKIT UNIVERSITAS MUHAMMADIYAH
CIREBON**

xvii + 50 halaman + 5 tabel + 1 bagan + 11 lampiran

ABSTRAK

Resume medis merupakan ringkasan dari pelayanan medis yang diberikan oleh tenaga medis khususnya dokter selama masa perawatan sampai pasien di pulangkan baik dalam keadaan hidup maupun meninggal. Kelengkapan pengisian resume medis di Rumah Sakit Muhammadiyah Cirebon hanya mencapai 32% disebabkan oleh kesibukan dokter penanggung jawab pasien dan pasien meminta pulang paksa menyebabkan resume medis pasien tersebut belum terisi lengkap. Tujuan penelitian ini untuk mengetahui Kelengkapan Pengisian Resume Medis pada Pasien Rawat Inap BPJS di Rumah Sakit Universitas Muhammadiyah Cirebon.

Jenis Penelitian yang digunakan adalah deskriptif dengan pendekatan kuantitatif. Populasi dalam penelitian ini yaitu formulir resume medis rawat inap BPJS bulan Desember 2022 S/d Februari 2023 sebanyak 2196 dokumen. Jumlah sampel 96 formulir resume medis. Teknik pengambilan sampel menggunakan *purposive sampling*. Teknik pengumpulan data menggunakan metode observasi dengan instrumen penelitian yang digunakan adalah lembar *checklist*. Penelitian ini dilakukan di unit rekam medis Rumah Sakit Muhammadiyah Cirebon pada bulan Juni 2023.

Hasil Penelitian ini menunjukkan bahwa dari 96 formulir resume medis yang diteliti, sebanyak 31 (32%) formulir resume medis yang terisi lengkap dan sebanyak 65 (68%) formulir resume medis yang tidak terisi lengkap. Kelengkapan pengisian resume medis di Rumah Sakit Muhammadiyah Cirebon belum (100%), masih terdapat komponen-komponen yang tidak terisi lengkap. Diharapkan bahwa perlu adanya evaluasi dan sosialisasi kepada petugas rekam medis, dokter dan perawat.

***COMPLETENESS OF FILLING OUT MEDICAL RESUMES IN BPJS
INPATIENTS AT THE UNIVERSITY OF MUHAMMADIYAH CIREBON
HOSPITAL***

xvii + 50 pages + 5 tables + 1 chart + 11 appendices

ABSTRACT

A medical resume is a summary of medical services provided by medical personnel, especially doctors, during the treatment period until the patient is discharged either alive or dead. The completeness of filling out medical resumes at Muhammadiyah Hospital Cirebon only reached 32% due to the busy work of the doctor in charge of the patient and the patient asked for forced discharge causing the patient's medical resume to not be filled completely. The purpose of this study was to determine the Completeness of Medical Resume Filling in BPJS Inpatients at Muhammadiyah University Hospital Cirebon.

The type of research used is descriptive with a quantitative approach. The population in this study is the BPJS inpatient medical resume form for December 2022 to February 2023 as many as 2196 documents. The sample number is 96 medical resume forms. The sampling technique uses purposive sampling. Data collection techniques using observation methods with the research instrument used are checklist sheets. This research was conducted at the medical record unit of Cirebon Muhammadiyah Hospital in June 2023.

The results of this study showed that of the 96 medical resume forms studied, as many as 31 (32%) medical resume forms were filled out completely and as many as 65 (68%) medical resume forms were not filled out. The completeness of filling out medical resumes at Cirebon Muhammadiyah Hospital has not been (100%), there are still components that are not filled completely. It is expected that there needs to be an evaluation and socialization to medical record officers, doctors and nurses.

Keywords : Incompleteness, Medical Resume, BPJS Hospitalization
